## Solutions to Assignment \#1

1. Use a Truth Table to establish the following equivalences known as one of De Morgan's laws:
(a) $\neg(P \wedge Q) \equiv \neg P \vee \neg Q$

## Solution:

| $P$ | $Q$ | $\neg P$ | $\neg Q$ | $P \wedge Q$ | $\neg(P \wedge Q)$ | $\neg P \vee \neg Q$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| $T$ | $T$ | $F$ | $F$ | $T$ | $F$ | $F$ |
| $T$ | $F$ | $F$ | $T$ | $F$ | $T$ | $T$ |
| $F$ | $T$ | $T$ | $F$ | $F$ | $T$ | $T$ |
| $F$ | $F$ | $T$ | $T$ | $F$ | $T$ | $T$ |

Observe that the columns corresponding to $\neg(P \wedge Q)$ and $\neg P \vee \neg Q$ have the same truth values. Thus, $\neg(P \wedge Q) \equiv \neg P \vee \neg Q$.
(b) $\neg(P \vee Q) \equiv \neg P \wedge \neg Q$

## Solution:

| $P$ | $Q$ | $\neg P$ | $\neg Q$ | $P \vee Q$ | $\neg(P \vee Q)$ | $\neg P \wedge \neg Q$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| $T$ | $T$ | $F$ | $F$ | $T$ | $F$ | $F$ |
| $T$ | $F$ | $F$ | $T$ | $T$ | $F$ | $F$ |
| $F$ | $T$ | $T$ | $F$ | $T$ | $F$ | $F$ |
| $F$ | $F$ | $T$ | $T$ | $F$ | $T$ | $T$ |

Observe that the columns corresponding to $\neg(P \vee Q)$ and $\neg P \wedge \neg Q$ have the same truth values. Thus, $\neg(P \vee Q) \equiv \neg P \wedge \neg Q$.
2. Prove the following distributive properties
(a) $P \wedge(Q \vee R) \equiv(P \wedge Q) \vee(P \wedge R)$

## Solution:

| $P$ | $Q$ | $R$ | $Q \vee R$ | $P \wedge Q$ | $(P \wedge R)$ | $P \wedge(Q \vee R)$ | $(P \wedge Q) \vee(P \wedge R)$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| $T$ | $T$ | $T$ | $T$ | $T$ | $T$ | $T$ | $T$ |
| $T$ | $T$ | $F$ | $T$ | $T$ | $F$ | $T$ | $T$ |
| $T$ | $F$ | $T$ | $T$ | $F$ | $T$ | $T$ | $T$ |
| $T$ | $F$ | $F$ | $F$ | $F$ | $F$ | $F$ | $F$ |
| $F$ | $T$ | $T$ | $T$ | $F$ | $F$ | $F$ | $F$ |
| $F$ | $T$ | $F$ | $T$ | $F$ | $F$ | $F$ | $F$ |
| $F$ | $F$ | $T$ | $T$ | $F$ | $F$ | $F$ | $F$ |
| $F$ | $F$ | $F$ | $F$ | $F$ | $F$ | $F$ | $F$ |

Observe that the columns corresponding to $P \wedge(Q \vee R)$ and $(P \wedge Q) \vee(P \wedge R)$ have the same truth values. Thus,

$$
P \wedge(Q \vee R) \equiv(P \wedge Q) \vee(P \wedge R)
$$

(b) $P \vee(Q \wedge R) \equiv(P \vee Q) \wedge(P \vee R)$

## Solution:

| $P$ | $Q$ | $R$ | $Q \wedge R$ | $P \vee Q$ | $P \vee R$ | $P \vee(Q \wedge R)$ | $(P \vee Q) \wedge(P \vee R)$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| $T$ | $T$ | $T$ | $T$ | $T$ | $T$ | $T$ | $T$ |
| $T$ | $T$ | $F$ | $F$ | $T$ | $T$ | $T$ | $T$ |
| $T$ | $F$ | $T$ | $F$ | $T$ | $T$ | $T$ | $T$ |
| $T$ | $F$ | $F$ | $F$ | $T$ | $T$ | $T$ | $T$ |
| $F$ | $T$ | $T$ | $T$ | $T$ | $T$ | $T$ | $T$ |
| $F$ | $T$ | $F$ | $F$ | $T$ | $F$ | $F$ | $F$ |
| $F$ | $F$ | $T$ | $F$ | $F$ | $T$ | $F$ | $F$ |
| $F$ | $F$ | $F$ | $F$ | $F$ | $F$ | $F$ | $F$ |

Observe that the columns corresponding to $P \vee(Q \wedge R)$ and $(P \vee Q) \wedge(P \vee R)$ have the same truth values. Thus,

$$
P \vee(Q \wedge R) \equiv(P \vee Q) \wedge(P \vee R)
$$

3. Establish the following rule of reasoning known as Modus Ponens:

$$
[(P \Rightarrow Q) \wedge P] \Rightarrow Q
$$

## Solution:

| $P$ | $Q$ | $P \Rightarrow Q$ | $(P \Rightarrow Q) \wedge P$ | $[(P \Rightarrow Q) \wedge P] \Rightarrow Q$ |
| :---: | :---: | :---: | :---: | :---: |
| $T$ | $T$ | $T$ | $T$ | $T$ |
| $T$ | $F$ | $F$ | $F$ | $T$ |
| $F$ | $T$ | $T$ | $F$ | $T$ |
| $F$ | $F$ | $T$ | $F$ | $T$ |

Observe that the values in the column corresponding to $[(P \Rightarrow Q) \wedge P] \Rightarrow Q$ are always true. This establishes the result.
4. Establish the Disjunctive Syllogism:

$$
[(P \vee Q) \wedge(\neg Q)] \Rightarrow P
$$

## Solution:

| $P$ | $Q$ | $\neg Q$ | $(P \vee Q)$ | $[(P \vee Q) \wedge(\neg Q)]$ | $[(P \vee Q) \wedge(\neg Q)] \Rightarrow P$ |
| :---: | :---: | :---: | :---: | :---: | :---: |
| $T$ | $T$ | $F$ | $T$ | $F$ | $T$ |
| $T$ | $F$ | $T$ | $T$ | $T$ | $T$ |
| $F$ | $T$ | $F$ | $T$ | $F$ | $T$ |
| $F$ | $F$ | $T$ | $F$ | $F$ | $T$ |

Observe that the truth values in the last column are always true. Thus, [ $(P \vee$ $Q) \wedge(\neg Q)] \Rightarrow P$.
5. Give the negations of the following statements.
(a) $\forall \varepsilon>0 \exists n \geqslant 1$ such that $\frac{1}{n}<\varepsilon$.

Answer: $\exists \varepsilon>0$ such that $\forall n \geqslant 1, \frac{1}{n} \geqslant \varepsilon$
(b) $\forall \varepsilon>0 \exists a \in A$ such that $a<\varepsilon$.

Answer: $\exists \varepsilon>0$ such that $\forall a \in A, a \geqslant \varepsilon$
